

ADDITIONAL NOTE FOR ENHANCEMENT

- Use this background sa loading screen. If you can add some animation on the background that would be nice. You will need fake a delay

- Change the blurr background sa Log in into blurr background ni Hacko na nasa loading screen..

- In the map, please align the game 10, put it in the right

- If possible din po, pinapa-add ng panel namin yung pagkakaroon ng invalid variables. Example: pinulot ni Hacko is int na hindi naman kasali or part ng dapat pulutin, magkaron ng danger indicator then magbawas ng life (applicable only to **1. THE SCAPE ROOM, levels 8-10**)
- **GAME 5: Array Adventure (Level 10)-** choke area po, hindi makatawid.
- **GAME 8: CLASSROOM RESCUE** -pag iba ibahin set up ng mga objects and characters per level. If possible add enemies na pwedeng maging challenge kay hacko para while coding, there's an intense thing na mangyari.

- **GAME 9:** add more enemies for more challenging game. Baka pwede din magkaroon ng bombs na pwedeng pulutin then magkaroon ng close bricks na pwede bombahin para mabasag.

Search Bomb It for reference

- **GAME 10: BIG BOSS** -since ito po pinaka madugong game, I suggest make it more challenging. Yung Loop Master po na object, baka pwede ireplace ng Big Boss Robot. Then pagdating na sa final Level (10), si Loop Master (Robot) na ang magiging kalaban ni Hacko. Tapos, multiple coding po sana ang sasagutan hindi isang code. Para habang naglalakad papalapit si Loop Master, tuloy tuloy sa coding is user hanggat di pa napapatay si Loop Master. Magkaroon din po sana ng life indicator is Loop Master sa pagbawas ng life niya habang inaattack ni Hacko.
